

Cross-Stack Storage Tubs

Akro-Mils announces the expansion of its line of Akro-Tubs and Cross-Stack Akro-Tubs with the addition of cross-stack model 34305 (25" L x 16" W x 8.5" H). This

new tub size, which comes in colors Grey, Blue or Natural, has a capacity of 9.75 gallons and 1.25 cu. ft. The tubs are made from FDA-sanctioned materials and are ideal for both food service and industrial applications. They feature stacking grooves that allow stable, 90-degree stacks of tubs and nest when empty to conserve storage space. Sturdy molded-in handles provide comfortable lifting while extra-thick walls offer superior strength. These plastic tubs are compatible with standard 36" shelving units and conveyor systems.
