Two-Way Solenoid Valves

Omega's new SV6100 series of 2-way solenoid valves feature NSF approved

materials and are suitable for compressed air, inert gas, synthetic oil and water applications. The valves are internally piloted with assisted lift valves featuring lead-free Brass, stainless steel construction and FKM seal material. They function in a temperature range of -10 to 137°C (14 to 280°F) and are available in 120 Vac Standard (220 Vac and DC Coils are optional), 8 W, AC Coils Standard and 12 or 14 W, AC or DC coils models. A strain-relief connector is supplied with each unit and a half inch conduit plug is also available.
