

Chemical Resistant Fume Hood

Nikita Ernst, Associate Editor

AireStream Fume Hoods are constructed entirely of chemical resistant, flame retardant, non-metallic composite resin materials and feature an exclusive "Unitized" construction that does not require screws, bolts, rivets, or metallic hardware to assemble. The fume chamber is

one molded piece with all corners covered for easy cleaning and light reflectivity. This series of fume hoods is UL 1805 certified and is offered in 48", 60", 72" and 96" widths in either constant air volume or restricted bypass models. This hood is equipped with a 36" high extended view height, exclusive slotted rear VaraFlow baffle system, aerodynamic sash lift with perforated air-sweep feature, and molded-in belled outlet collar for reduced airflow resistance.
