

Scraped Surface Heat Exchanger

Nikita Ernst, Associate Editor

Terlet has launched the new Terlotherm Delta range scraped surface heat exchanger. This fully redesigned version of the

Terlotherm has additional new sizes, upgraded certified USDA hygienic design, increased and increased heat transfer surface area.

Special design features include:

- UHT pasteurization of particulates up to 1" in size
- USDA Dairy and Poultry certification
- Magnetic, X-ray and Metal detectable scraper blades
- Metal detectable gaskets
- 3 - 75 sq ft dual heat exchange cylinders packaged into (1) unit with a small foot print
- Bottom driven design easy maintenance and no risk of oil contamination
- Lowest operating and maintenance costs versus other styles of SSHE
